

Go Daddy Web Build A Thon

Introduction

Hi, I am **Dhanush Prabhu S**, 2nd year B.tech(IT) student. With help of this [Go Daddy web build a thon](#) I have build an **E-commerce** website using wordpress and hosted it in godaddy and the link is [here](#)
I have build an online Fashion retailer website as istore.

Theoretical Analysis

Electronic commerce or ecommerce is a term for any type of business, or commercial transaction, that involves the transfer of information across the Internet. It covers a range of different types of businesses, from consumer based retail sites, through auction or music sites, to business exchanges trading goods and services between corporations. It is currently one of the most important aspects of the Internet to emerge.

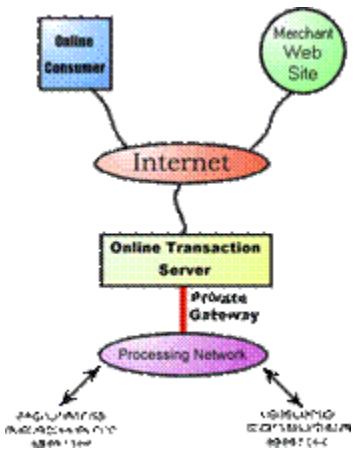

Working of E-COMMERCE

The consumer moves through the internet to the merchant's web site. From there, he decides that he wants to purchase something, so he is moved to the online transaction server, where all of the information he gives is encrypted. Once he has placed his order, the information moves through a private gateway to a Processing Network, where the issuing and acquiring banks complete or deny the transaction. This generally takes place in no more than 5-7seconds..

There are many different payment systems available to accommodate the

varied processing needs of merchants, from those who have a few orders a day to those who process thousands of transactions daily. With the addition of Secure Layer Technology, E-COMMERCE is also a very safe way to complete transactions.

I have used Cash on delivery, STRIPE and Paypal to maintain a secure payment system.

Experimental Investigation

Simulation principle. Experiment design is to maximize e-commerce close to the actual operation of the e-commerce activities, as close as possible real-life e-commerce mode of operation, management and operating methods. Experiment content and manner is based on simulation application system. All the experiment system should be able to find the prototype in reality. After know about theoretical knowledge, students could quickly get exercises in the open practice to deepen understanding of the concept of principles, to achieve full integration of theory and practice. Whether real or simulated environment, should let students through different identities, different roles to participate in actual combat the practice, feel the real business took place.

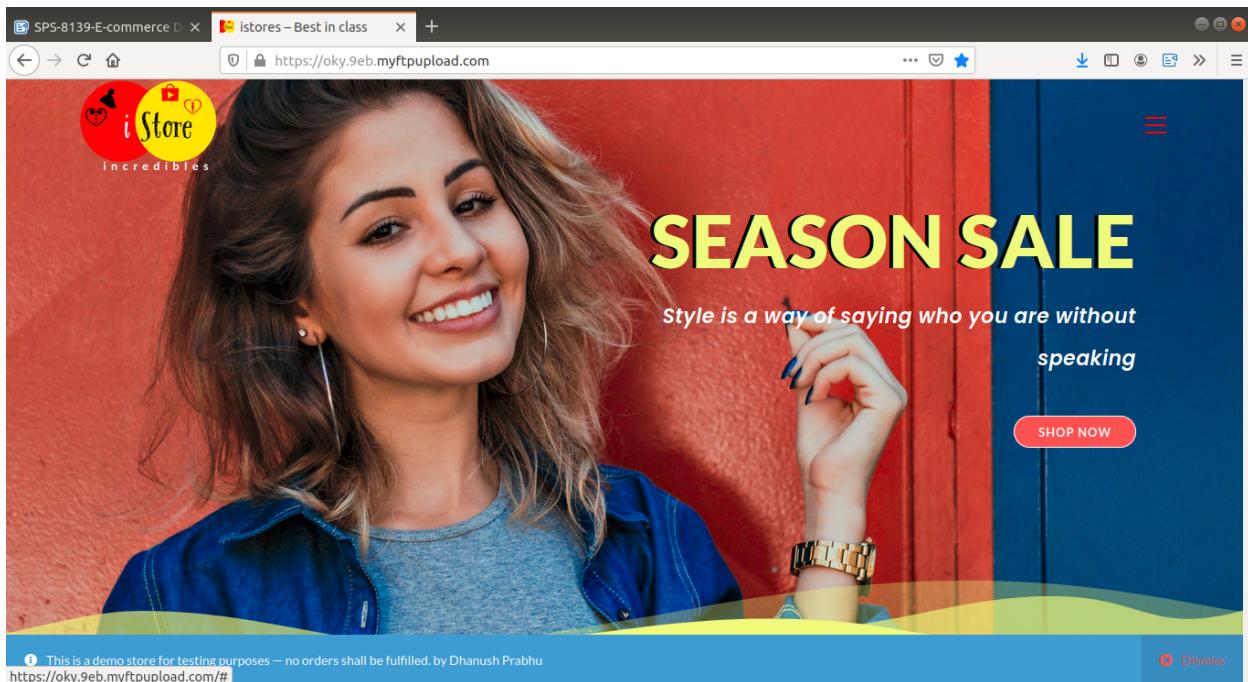

WORDPRESS AND GO DADDY WEB HOSTING

I have build the website with wordpress and it was very easy to use compared to our normal traditional coding and the hosting application provided by the go daddy was very easy to access

Results

I have attached my website's final view screenshots below

MENU

SHOP

A screenshot of a WordPress-based e-commerce website. The header shows the site title 'istores' and a user 'Howdy, dhoni'. The main content area displays a grid of products: 'Blue Stylish Shirt', 'Hand Bag', 'Gold - EDIFICE', and 'Blue formal shirt'. Each product has a 'SALE!' badge. The URL in the address bar is https://oky.9eb.myftupload.com/all-products/. The sidebar on the right includes social sharing buttons for Twitter, Facebook, Google+, and Pinterest, and a newsletter sign-up form.

MY ACCOUNT

The screenshot shows the "Orders" section of the account page, featuring a sidebar with user info and navigation links:

Blue Stylish Shirt

★★★★★ (1 customer review)

₹5,318.18 – ₹5,545.45

It is a long established fact that a reader will be distracted by the readable content of a page when looking at its layout. The point of using Lorem Ipsum is that it has a more-or-less normal distribution of letters, as opposed to using 'Content here, content here', making it look like readable English. Many desktop publishing packages and web page editors now use Lorem Ipsum as their default model text, and a search for 'lorem ipsum' will uncover many web sites still in their infancy. Various versions have evolved over the years, sometimes by accident, sometimes on purpose (injected humour and the like).
